TITLE : LAMINATE TYPE COHERENT SPHEROIDAL PIGMENT AND COSMETIC
FORMULATING THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To prepare a cosmetic excellent in usability such as slip properties and coloring in a coherent color which are unattainable in conventional technology, capable of concealing shape troubles of the skin such as wrinkles, poil foramens and roughness of texture together with improving color tone troubles such as ruddy face, freckle, blot and dark skin.

SOLUTION: This invention solves the above problems by providing (1) a laminated type coherent spheroidal pigment comprising mono dispersed spheroidal particles, having a core-shell structure comprising alternating layers of a metal oxide having a low refractive index and a metal oxide having a high refractive index, and (2) a laminated type coherent spheroidal pigment, having a core-shell structure comprising alternating three or more layers of the metal oxide having the low refractive index and the metal oxide having the high refractive index. This invention also solves the above problems by providing the cosmetic including the laminated type coherent spheroidal pigment.
